

COMMUNICATION

STRUGGLING TO ENHANCE THE VALUE PROPOSITION OF BENEFITS

Educate employees with content-rich multimedia on multi-platform system!

Employees typically receive a printed guide during open enrolment, throw it in a drawer, and then have a hard time finding it when it's needed most. Getting information online requires access to multiple sites for information on benefits, payroll, wellness and others.

A single platform, in concert with year-round communication delivered through the HUB and Pocketpal, helps employees quickly and easily find everything they need about benefits and related programs and tools their employers offer.

Workforce Junction has partnered Touchpoints to offer an integrated benefits portal and mobile app.

Simple and effective benefits communication!

Touchpoints Online

The online portal can be customized with a client's branding and content, giving small to mid-size companies and their employees a "big company" experience.

Employees can view plan details and compare plans side-by-side.

The portal is also equipped with single sign-on (SSO) to enrollment, which makes communication of benefits consistent and accurate.

The Pocketpal™

Access benefit plans and important information on the mobile app

- Fully integrated with single sign-on
- Convenient access to plan details and current enrollment information on a smartphone
- Store personal details such as provider contacts, images of ID cards, details on pharmacy and prescription drugs, and notes for medical appointments
- Host links to provider directories and carrier contacts
